

BECOPAD

The purest way to full taste.
First-ever drip-free filter sheet.

Five reasons for using **BECOPAD**:

- 1** First-ever drip-free filtration:
No product loss
- 2** Free from minerals:
Full retention of valuable product ingredients
- 3** Produced from pure cellulose:
100 % biodegradable
- 4** Saves time and costs:
Efficiency increased by approx. 20 %
- 5** Environment-friendly:
50 % water saving

The new freedom: Drip- and loss-free filtration

Purity in taste and appearance: The pure white **BECOPAD** depth filter sheet shows significantly less discoloration, even after filtration of caramelised sugar syrup. Drip losses are reduced to a minimum. Filter rinsing and re-application become much easier, which saves time and costs.

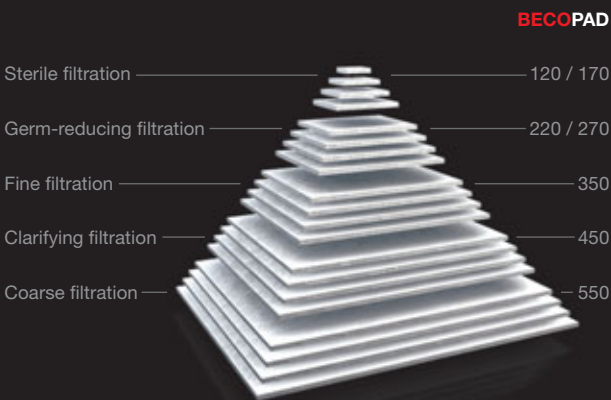

The new naturalness: Without mineral additives

BECOPAD not only stands for superior filtration performance and hygiene. **BECOPAD** also enables safe sterile filtration, without any mineral-containing constituents.

Get pure enjoyment.

BECOPAD from BEGEROW revolutionises the filtration process. For the first time, technological innovation makes it possible to combine strictest standards for microbiological safety with full retention of valuable flavour and colour – the best thing that could ever happen to your product.

BECOPAD is available in seven grades of clarifying sharpness. From coarse to sterile filtration.

BECOPAD compared in practice

A Standard filter sheet

Conventional depth filter sheets tend to become stained quite quickly – a possible indication of drip losses.

B BECOPAD

At the end of the filtration **BECOPAD** shows no more than slight discolouration: no drip losses.*

* With optimum filter compression and sound filter plates, filter frames and gaskets

Economic, environment-friendly, exceptionally pure and organic: discover the benefits of the **BECOPAD** world innovation.
