BECOPAD receives INTERVITIS INTERFRUCTA Innovation Award

Now it is official. BECOPAD, the depth filter medium made by BEGEROW wins the coveted silver innovation award of the German Winegrowers' Association "Deutscher Weinbauverband e.V."

The message was welcomed with great joy at a press conference in Mainz today. The award will be officially handed over during the opening ceremony of the INTERVITIS INTERFRUCTA trade show in Stuttgart on March 24, 2010.

BECOPAD is currently revolutionizing filtration operations everywhere in the world. Mineral-free, without drip and other losses, protects the product. In a nutshell: Aroma and colour of the wine are fully maintained with a product that is 100 % biodegradable. These arguments convinced the expert jury.

Another BEGEROW product also forms part of the official INTERVITIS innovations: the newly developed fermentation concept SIHAFERM PureNature for very individual wine styles.

More exciting innovations are available at the BEGEROW stand in hall 3, stand B10.

About BEGEROW:

BEGEROW is a leading system provider for sophisticated solutions in the filtration of liquids. With approximately 250 employees worldwide and headquarters in Langenlonsheim (Germany) BEGEROW develops and produces technologically innovative filter media and filtration systems for the beverage and food industry as well as for the chemical, pharmaceutical and industrial sectors.
